Recommended Airflow and Baffle to Maximize Refrigerator Cooling

Note: Added baffle is constructed of sheet metal 18" X 30". 30" is width of (my) refig. Yours may be a different width.

Note: Left edge of baffle rests on Cooling System Condenser

Note: Ends of baffle connected to refig outside wall with H/D (Gorilla) duct tape, and to condenser with holes/cable ties

Note: Any air void spaces on top and sides of refig. should be packed with insulation.

Note: Rear insulation should touch refig rear fins to direct airflow only through fins system.
